

Cold Press Spares

Materials used:

1.4121 SS, 1.4125 SS, 1.2379 SS and 51420 CHROME NICKEL

We source our materials from a German-Turkish joint venture which is known worldwide for top quality products. See www.birlesikmetal.com.tr

We perform a heating and hardening process that subjects components to 1030-1050 C temperatures (depending on material) and reheated after cooling to 150 C. Final processing includes coating with nickel phosphate to increase durability.

Filter: 600 USD

Screw mill: 400 USD

Manson: 150 USD

Star: 250 USD

Nozzle: 50 USD (5 different sizes)

Ceramic ring heater: 200 USD

Prices do not include shipping and are subject to change without notice.

We maintain an inventory of our high quality replacement parts that are kept stocked in our Nebraska facility. Nebraska Screw Press is the authorized North American source for this equipment manufactured by www.tokultarim.com. These parts are also interchangeable with your Komet DD series press head and use harder steel.

Contact us for references, pricing and further information regarding your next project.
